brayon ====== Nycto I'm curious how the author's detailed explanation of the REPL worked with his weird setup, where he was running the script in their computer and served up the output to the web. I had always assumed that the repl and the script were running in parallel. This makes more sense, but it's still interesting how he was able to completely hide the repl inside the user's browser. ~~~ brayon This was pretty much my setup for the last 8 or so years. At least since when I was working on Joy (www.joy.clojure.org). I'm now working on a production Clojure script (also written in Clojure) hosted on Heroku. This has made things pretty different though. Q: Remove row from a JTable I have a simple JTable, which gets populated using a DefaultTableModel. In the model, there's a

column with an image. On button click, a dialog appears, and user can upload an image and replace the currently displayed one. Is there a way to remove the row, so that the image gets deleted? I'm using Netbeans. A: If your DefaultTableModel has a reference to the object that is being displayed, then you can remove it from that reference and the model will discard the entry. The example below is for a model with a String and a String. In this case, you would remove the String that represents the image from the model and it will be removed from the table. import java.awt.BorderLayout; import java.awt.event.ActionEvent; import java.awt.event.ActionListener; import java.util.HashMap; import java.util.Map; import java a1d647c40b

Edmonton park has gone viral. The video shows the truck driver pulling up to the kids, getting out of the cab, and arguing with them. READ MORE: Woman rages at kids for parking on the sidewalk She appears to be telling the kids to get off the property and leave them alone. One of the boys in the video then approaches her and they can be heard arguing. At one point, the truck driver pulls out a gun, or a screwdriver, and throws it at one of the kids. She then gets back in the cab and leaves. Story continues below advertisement The city said they are aware of the incident, and working with the RCMP and the Edmonton Police Service to investigate. "Based on our investigation to date, it is unlikely that a parking enforcement violation occurred," a spokesperson said. "At the same time, this

individual is not a city employee and we are looking into this matter to see if we can do anything to help the individual." The YouTube page for the video shows that it was posted on June 7.
