“The biggest challenge is to get it ready for launch,” explained Ahmed El Zabheri, Senior Producer on FIFA’s Sports Game Division. “We are really happy with the results we have achieved, but we have done that using in-house physics. We have to wait to see how this will work in the real environment.” So far, FIFA 22 is running at 1080p on Xbox One and at 720p on PS4. Players and stadiums all have been updated to new versions, with new polygonal players and new stadiums. “We did the look and feel upgrades that we normally would have done for a new console launch,” said El Zabheri. The team won’t know how well it has done with the launch of FIFA 22 until they’ve spent more time testing it in the real-world and with players. “That is something that we have already started doing. We have been testing the different aspects of the game in the office with the real player models and real stadiums. The real-world, real-life data that we have collected is going to help us in the tuning of the physics engine. There are a number of variables that we haven’t yet got to grips with. For example, in the real environment, there are a lot of things that would change. It’s the little details that will make all the difference.”

Q: Explanation of the result of the following algorithm  
The following algorithm walks through a list of ints, and stores each digit of the integer in a String. I have a basic knowledge of Java, but I don't understand the first iteration:  

```
public static void  
sortByDigit(int num) { String numStr = String.valueOf(num); List list = new ArrayList();  
while (numStr.length() > 0) { String digit = Integer.toString(numStr.charAt(0));  
list.add(digit); numStr = numStr.substring(1); } Collections.sort(list); for (String str : list) {
```

## **Features Key:**

- FIFA 22 includes the first ever update of the “this year in review” Mode: The Coach. This is an all-encompassing career mode where players can take their perfect team with them wherever they decide to go. In addition to the new “this year in review” Mode there is the Player Career mode, and some new features are included too, such as propulsion, medicine bottles, speed bonuses, weather and fatigue and goal celebrations.
- FIFA season mode and the all-new “this year in review” mode combined.
- Brand new meaning to the term ‘home advantage,’ as players can choose between real stadiums and remodeled versions from around the world. The remodeled stadiums will reflect your real-life surroundings, offering alternate atmospheres such as wooden floors and natural ceilings that fit in with the theme. The custom stadiums also boast upgraded kits and on-screen flags to guide your on-pitch action.
- FIFA 22 built for FIFA Mobile and FIFA Online Seasons.
- Sync FIFA Ultimate Team API data between the different platforms for more in-depth competitions.
- Brand new FIFA Ultimate team cards, blocks and player roles.
- Brand new context-sensitive cards, blocks and player roles; as well as whole categories.
- Brand new game mode cards for Ultimate team
- Additional in-game user interaction features. Players can now share individual gameplay goals, aerial controls, and player ratings from the likes of Kiss Bunt, Futgraph, Statszone and the FIFA Visual Zone.
- Brand new Animation Engine. With the new animation engine, player likeness are now able to be more natural and life-like during one-on-one, mutual and off-ball action.
- Brand new Matchday engine. Enhance communication during the match through a real-time chat and visual cues to add atmosphere to the pitch.
- Added Feelings technology, which allows the player’s mood and heart to be tracked throughout the game to affect his performance.
- Brand new Vision Based Control. The players can now see even the subtleties during one-on-ones, and the AI is better at building around the ball and keeping it in play.

FIFA: the name alone represents soccer, but what does it actually mean? Well, FIFA stands for FIFA Interactive, or FIFA Interactive Entertainment. This is the name that EA Sports has used when developing video games for the FIFA franchise since they released the franchise's first title, FIFA Soccer, in 1991. The phrase "FIFA Interactive" gives a little more context to the meaning of the word "FIFA," it points out the fact that as a video game series, FIFA is a result of input and innovation from the developer itself, and not simply a video game that's tied to the world of soccer. However, this phrase may not be very reassuring to the folks that don't already own FIFA, as it is quite obvious that the phrase "FIFA Interactive" is just another label that EA has given to their game to indicate the new direction that the series has taken. We don't know what EA will do in the future with the FIFA Interactive label. Will it be changed or replaced? If you don't own the FIFA franchise, one thing you should know before you continue reading is that the first title in the FIFA series is not very good. It's fun to play (and it's made by the same developer that has been working on FIFA since the very first game), but that's about as close to "good" as you can get for the very first game in a franchise. After that, you can count on the gameplay for the following games to be extremely polished and deep, but it's usually the case that the developer starts to lose some control when it comes to bringing its ideas to the real world. It was also the case that when EA Sports started making games for the consoles, the focus was on having the team at EA Canada develop the games with the teams that were going to release the games in the market, as opposed to all the staff in EA Vancouver who had been working on the FIFA series since the very beginning. The first game in the series didn't have many of the things that would become expected in FIFA titles. The reason why people who don't own a copy of FIFA would want to learn a little more about the franchise is so that they can see what has been improved over the years and how the series has evolved. For example, one thing that you should know about FIFA is the fact that the first game was not the result of one-off developers at EA working on a game for FIFA. The two principle developers of the game came from within EA bc9d6d6daa
